

Conlit Kit

Kit for fire-resistant applications

**INSPIRED
BY
NATURE.**

Product description

Conlit Sealant is a single-component, fire-resistant kit supplied in a tube.

Application

Conlit Sealant can be used for sealing the gaps between Conlit 150 U pipe sections and a basic structure (up to 30 mm). Conlit Kit swells slightly in the event of fire and forms a perfect seal.

Conlit Kit

Kit for fire-resistant applications

Range

- 20 tubes per box.

Storage

Unopened tubes of Conlit Kit can be stored for 12 months. Store under a dry, frost-free conditions at a maximum temperature of 35°C.

Services

Technical advice

You can contact our specialists for advice on building regulations, thermal calculations, details, product applications, use and topical issues such as energy efficiency, fire safety, circularity and acoustics. Our technical specialists would be happy to consult with you at an early stage in order to find the optimal insulation solution for your project.
