

Installation Manual

Multidisc

1

≤ 26 mm

Drill the desired gap of up to 26 mm in the wall.

5

Fold the Multidisc open so that it fits well around the service penetration.

2

Make sure the surface of the wall is free from dust, dirt and grease.

6

Carefully apply the Multidisc and make sure that the sealing side overlaps. Press the Multidisc properly onto the structure and around the service penetration!

3

Feed the required installation components through.

7

Fill in the conformity statement and paste it next to the fireproof seal.

4

Remove the protective film on the back of the Multidisc.

Information

For use and for more information about an application, refer to the Mulcol documentation, local and international approvals. See the **Mulcol Fire Protection app** for the correct application in combination with fire resistance, or use our selector at www.mulcol.com
For professional use only.
