

RAYSTAT-V5 CONTROL UNIT

nVent RAYCHEM RAYSTAT V5 is an electronic line sensing or proportional ambient sensing (PASC) controller for self-regulating heating cables. Wall mountable for outdoor location, it measures ambient temperature and determines the cycle time when the heating cables will be energized, resulting in very significant energy savings.

FEATURES

Easy set-up and programming

Flexible temperature control for pipe temperature line sensing or ambient temperature sensing

Proportional ambient sensing control (PASC) algorithm for enhanced energy savings in ambient sensing mode

Alarm relay with change over contact to signal power, temperature or communication problems

Pipe temperature monitoring, with high and low temperature alarm

Offsite configurable: can be set up prior to final installation

Reliable during long life: 6 year extended product warranty available
